

## Accessing Estimate Drug Costs Tool

Estimate Drug Costs is an online tool that provides members with personalized, real-time estimates for out-of-pocket drug cost based on their current health plan via our secure member website, Aetna Navigator. Members can also see how much they could potentially save by choosing a generic over a brand name drug. Through this tool, members can:

- Compare costs between generics, preferred brand and non-preferred brand name drugs
- Select different drug strengths and dosages
- Choose and designate a default in-network retail pharmacy based on their network and plan design
- Compare the cost of a drug at retail versus mail order pharmacy
- View important drug information such as whether the drug requires prior authorization or has a quantity limit based on their plan
- Obtain additional information about the drug such as how it should be taken or possible interactions

From the Aetna Navigator homepage, click on “*Estimate Drug Cost*” under **Manage Prescriptions**.

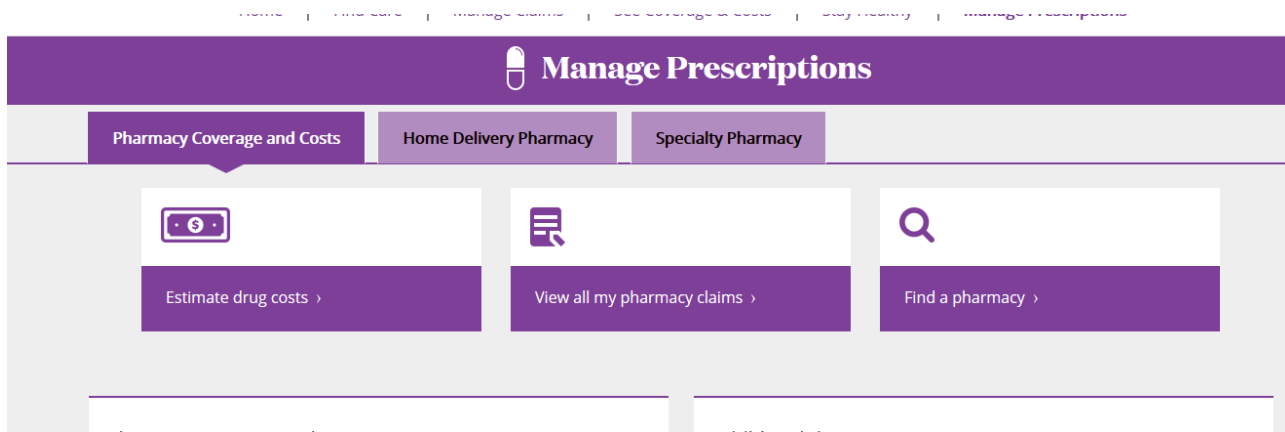

The image shows the Aetna Navigator homepage. At the top is a banner with a photograph of a father and son fist-bumping on a baseball field. The text "Live well" is overlaid on the right side of the banner. Below the banner is a navigation menu with five main categories, each with a list of sub-links:

On the next page, click on **Estimate drug costs**.

Type the drug name in the search box.

The member's name, preferred pharmacy location and most common dosage are auto populated. Confirm that the right information appears on the screen before clicking Search. Or, click 'Edit' to change any of the information.

The search results include both brand and generic options at both retail and mail order, if applicable to the plan. The lowest cost option is underscored so the member has all the information they need in one place
